

EFFICIENT ASSET MANAGEMENT WITH QR CODES

Enhance your company Asset Management
and its support by using QR Codes.

ENHANCE ASSET MANAGEMENT BY USING QR CODES

QR Tonic es la funcionalidad de ServiceTonic que permite mejorar la gestión de los activos y su soporte mediante el uso de códigos QR.

Easily label each device with its own QR code and immediately enable a new communication channel.

UNIVERSAL

Use any scanner or the ServiceTonic built-in scanner included in its mobile version, enabling universal access to device information, management and support. Extremely useful for all kind of companies including service providers.

01

EASY AND INTUITIVE FOR USERS

By simply scanning the QR code, users access the information on the device and can report incidents or requests.

02

EFFICIENT FOR TECHNICAL STAFF

Technical staff benefit from real-time access to device information and its incidents by simply scanning the QR code.

ADVANTAGES FOR EVERYONE

Reduce errors by always getting accurate real-time device information.

Scan for support, enhances troubleshooting by facilitating incident reporting.

Rapidez en la resolución de las incidencias.

Más control sobre el parque de activos que se gestionan.

CONFIGURABLE

Decide what information to show when an asset is scanned.

Choose between different ways to report incidents (anonymously, informed, logged in).

APLICABLE TO ALL TYPES OF ASSETS OR DEVICES

QRTonic can be used in all types of assets, such as computer equipment (PCs, printers, laptops, monitors), medical equipment, industrial equipment, vehicles, public furniture and even services such as cleaning or security.
